SUMMARY

AI/ML leader with 10+ years of experience driving enterprise AI adoption across Asia-Pacific. Deep expertise in Agentic AI, multi-agent orchestration, and go-to-market strategy for cloud AI platforms. Proven track record of building and scaling AI businesses from the ground up, achieving 20x growth in regional AI/ML revenue. Trusted advisor to C-suite executives on AI transformation, LLM strategy, and production deployment of autonomous systems. Experienced in building partner ecosystems, leading cross-functional teams, and translating cutting-edge AI research into enterprise-grade solutions across BFSI, Telecommunications, and Retail industries.

EXPERIENCE

Regional GTM AI Lead, JAPAC

Google Cloud (Google Asia Pacific Pte. Ltd.) | Singapore

Mar 2026 – Present

- Lead regional go-to-market strategy for Google Cloud's AI portfolio—Vertex AI, Gemini, and Agentspace—across Japan and Asia-Pacific, targeting enterprise adoption in Fortune 500 accounts
- Define customer acquisition, partner enablement, and competitive positioning motions for Google Cloud AI/ML services across priority JAPAC markets
- Partner with product, engineering, and field sales leadership to launch and scale AI solutions in BFSI, Telecommunications, and Retail verticals
- Build executive-level relationships with C-suite stakeholders at strategic accounts running large-scale generative and Agentic AI transformation programs
- Expand Agentic AI and multi-agent orchestration use cases across JAPAC, translating emerging Google Cloud capabilities into production deployment patterns for enterprise customers

Head of Agentic AI Business Development – ASEAN

Amazon Web Services Singapore Pte. Ltd. | Singapore

Nov 2020 – Feb 2026

- Achieved 20x growth in ASEAN AI/ML business over 5 years through strategic market development and customer adoption programs
- Led Agentic AI adoption across ASEAN, specializing in autonomous AI agents, multi-agent systems, and advanced orchestration patterns using Amazon Bedrock
- Drove enterprise implementations of Agentic AI solutions for Fortune 500 companies in BFSI, Telecommunications, and Retail sectors
- Built and executed go-to-market strategy for Agentic AI and autonomous systems across Southeast Asia
- Developed partner ecosystem for Agentic AI, enabling ISVs and SIs on agent frameworks, RAG systems, and tool integration patterns
- Keynote speaker on Agentic AI, autonomous systems, and responsible AI at major industry conferences including WTF Summit Singapore

AI/ML Senior Business Development Manager

Amazon Web Services Japan K.K. | Tokyo

Feb 2019 – Oct 2020

- Developed new market for AI and ML services in Japan, building go-to-market strategy from the ground up
- Established technology and ISV partner ecosystem for AI/ML services in the Japanese market
- Drove technology adoption for enterprise customers across diverse cultural and business contexts

Business Development Manager

GE Digital | Singapore

Nov 2016 – Feb 2019

- Developed and closed flagship deals with strategic enterprise customers for Industrial IoT and digital transformation solutions
- Built alliances and partnership ecosystem to expand market reach across ASEAN

STARTUP ECOSYSTEM ENGAGEMENT

CTO Advisory & Technical Mentorship

- Provide strategic technical leadership and product guidance to AI startups across Southeast Asia on Agentic AI architecture, LLM strategy, and go-to-market positioning
- Technical advisor to venture capital firms evaluating AI/ML startups, providing due diligence on Agentic AI capabilities and scalability
- Regular judge, mentor, and coach for AI startup accelerators and pitch competitions across ASEAN, supporting early-stage founders on technical strategy and commercial readiness

EDUCATION

Ph.D., Computer Science and Robotics Engineering The University of Tokyo	2003
M.S., Precision Engineering The University of Tokyo	2001
B.E., Mechanical Engineering University of Electro-Communications	1999

SKILLS

Agentic AI & Autonomous Systems: Multi-agent orchestration, Agent frameworks (LangGraph, CrewAI, AutoGen, Bedrock Agents), Tool calling patterns, RAG systems, Production deployment at enterprise scale

AI/ML Technologies: LLM fine-tuning & prompt engineering, Generative AI application development, Computer vision, NLP, Predictive modeling, Gemini, Claude, GPT-4

Cloud Platforms: Google Cloud (Vertex AI, Gemini, Agentspace, BigQuery ML), Amazon Web Services (Bedrock, SageMaker, Lambda, CDK), Serverless architecture, Cost optimization

Business & Leadership: Go-to-market strategy, Partner ecosystem development, Enterprise AI adoption, Product roadmap advisory, Cross-cultural leadership across ASEAN/JAPAC
